

MORE FROM WOOD.

Products, Decors and Services

**Your source of inspiration.
Your ideas supported.**

Egger Decorative Collection 2017 – 2019

U350 ST9

You're full of fresh ideas.
Here you have
the solutions.

The world of interior and furniture design is undergoing constant and accelerating change. The range of products is forever growing. But you stay ahead of the game. Always.

You have the answers. And the right product at the right time. In a constantly changing world, that's an advantage. Your advantage.

Your customers have high expectations. Which is why they turn to you. Because you exceed them. They desire the continual improvement of surfaces, decors and textures. You can provide that.

You provide the reliability that demanding clients appreciate. And because you have a wide and versatile repertoire of solutions, you're able to precisely meet your customers' requirements. Every time.

The huge variety of combinations in the new **EGGER Decorative Collection 2017–2019** will help you to build on these strengths. Valuable inspiration, smart solutions and a well-thought-through holistic system come as standard.

On the following pages discover an intelligent, interlocked system of the latest decors, materials, and services for the world of furniture and interior design.

EGGER Decorative Collection

An interlocked system to support you in your daily work.

From the comprehensive range of decors incorporating the latest technological advances, to the full suite of supporting products and services...

Reliable and quick product sourcing via global distribution network and availability from stock

Source of inspiration

→ Trend information, 9-Grid, Case studies, Combination ideas

Trend orientated and broad product matched collection from one source

New decors and textures allowing for numerous application possibilities

Full range of services to get the most out of our products

→ Sampling, myEGGER, EGGER App, VDS Online

...everything was designed to allow you to work with speed, confidence and success.
At EGGER, it all starts with you.

Products Furniture & Interior Design

Designing a home or a commercial interior? Need MFC for a kitchen or shop changing room? How about flame retardant materials for hotels or apartment blocks? You'll find everything here, from a single source. And because decors are available across almost all of our materials, with **short delivery times** and low minimum order quantities, you have **maximum design freedom**. Product sourcing doesn't get easier or quicker than this.

Comprehensive solutions in matching products.

Technical, aesthetic, economic and environmental constraints can make a project challenging. With the same decor being available on multiple products within the **EGGER Decorative Collection 2017–2019**, you can **specify the most appropriate material** for your application.

With **no compromise** on the colour scheme or performance, which means you can stay focused on your customers' needs and on what you do best.

Our product range

Your benefits at a glance

- A comprehensive decor range covering needs from classic to in-vogue, industrial styles
- Extensive choice of decors and textures in multiple materials
- By combining products with the same decor there is no compromise on appearance and performance
- Potential to save costs, owing to the above
- Assurance that you're using environmentally friendly products

Good to know

In addition to a **broad portfolio** of matching materials, such as Melamine Faced Boards (e.g. MFC), Laminate, and Edging, we also have a number of different substrates, which can be specified according to which application you are designing for:

from **high traffic areas** and **moisture resistance**, to **light weight** or **flame retardant products**.

In addition, our wide **range of Raw Boards** provide also **other finishes which allow** lacquering or painting.

→ Find out more on www.egger.com/decorative

Your benefits at a glance

- ➔ Offer the look and feel of solid wood, veneers, metals, stones and lacquer without the premium price tag
- ➔ Environmentally sustainable and recyclable
- ➔ Ready to use, requiring no oiling, staining, lacquering or further protection
- ➔ Easy to process

Good to know

Our Feelwood range of decors (p. 42) feature a double layer of paper to be able to create the depth of texture often seen with solid wood. Thin enhancement adds slightly to the overall thickness.

A variety of core boards are available such as P3 (moisture resistant) or Flammex (flame retardant) – you will always find a solution for your project.

➔ Find out more on www.egger.com/mfc

Eurodekor Melamine Faced Chipboard

Your multi-use material for furniture applications.

The ideal material for a **wide variety of vertical and horizontal furniture applications** such as cupboards, wardrobes, wall panelling and desking, Eurodekor MFC (Melamine Faced Chipboard) is a pre-bonded finished material, constructed from a decorative printed paper, covering a chipboard core which **requires no further fabrication** except edging.

Eurodekor MFC

Eurodekor Melamine Faced MDF Boards

Your versatile solution.

Eurodekor MDF (Medium Density Fibreboard) has exactly the same surface finish as Eurodekor MFC but has a fibreboard core, making it **the ideal choice for wall panelling or slatwall** in commercial applications, such as retail and hospitality.

Eurodekor MDF

Your benefits at a glance

- Excellent screw holding of heavy loads
- Suitable for curved applications
- Can be grooved or routed
- Edges can be painted, lacquered or left unfinished

Good to know

The fibreboard has a consistent, homogenous composition board which makes **further processing much easier**.

It is also **available in different qualities** depending on the application, such as flame retardant or MDF MB (membrane quality for deep routing) for example.

There are more than 200 decors available in the MDF range giving you a **multitude of design options**.

→ Find out more on www.egger.com/mdf

Your benefits at a glance

- Very good screw withdrawal resistance
- Very good bending strength in all directions
- Particularly well suited for large span constructions
- Provides high impact resistance
- Good dimensional stability

Good to know

Eurodekor Plus multilayer is **available on our core board Eurospan E1 P2.**

For a broader offer on all thicknesses, and from single piece orders use laminate bonded boards.

Specify Eurodekor MW to create a **seamless white finish.**

Thanks to the combination of many layers, Eurodekor Plus ML/MW boards are **suitable for both vertical and horizontal use.**

→ Find out more on www.egger.com/eurodekorplus

Eurodekor Plus ML / MW

Your dependable surface.

When you have a project requiring a higher level of strength or impact, MFC with additional layers could be the answer. Dependent upon the bending requirement in your project, we offer a 0.6 mm multilayer construction. Multilayer boards offer a **high-quality finish for surfaces** subject to high levels of stress. This makes them exceptionally well suited for use in commercial premises.

Eurolight Lightweight Board

Lightweight & high strength

– the perfect combination.

Eurolight is a sandwich construction made from chipboard top and bottom surface layers, combined with a **light, yet robust** recycled cardboard honeycomb core. A chunky look, combined with low weight and high strength makes it **perfectly suited to a wide range of applications** such as cladding, carcassing, table tops/desking, shelving, sliding doors, internal doors and furniture.

Eurolight Lightweight Board

Your benefits at a glance

- Create thick, premium looking furniture more easily and for less cost
- Up to 60 % lighter than its equivalent thickness in chipboard which makes furniture easier to carry around and to process
- High strength means less bending in wide spans
- Hollow core enables hidden LED lighting and wiring
- Environmentally friendly product saving resources

Good to know

Eurolight is available either with a **decorative surface**, **raw** (for bonding veneer or laminates), or a **painting grade option** (for client specific uni colours).

It comes in either 38 mm or 50 mm thickness, with matching edging. To further emphasise the thickness, you can use one of our **Accent edges** or one of our **ABS edges** to create a contrast (p.25).

→ Find out more on www.egger.com/eurolight

Your benefits at a glance

- Anti-Fingerprint finish on PerfectSense Matt prevents smudges and smears on even the most tactile of areas, such as handleless doors
- New level of reflection of PerfectSense Gloss allows you to create a high-end look comparable to glass or acrylic
- Easier fabrication than glass
- The wide width of 2070 mm provides better utilization and less wastage

Good to know

MDF as a homogeneous core material ensures that PerfectSense has a **smooth and flawless surface**. A unique UV coating is added that is both **hardwearing and protective**.

To create spaces and furniture with impact, combine the **extreme textures** in a single design emphasising their contrasting appearance.

Due to its unique construction specific processing instructions should be followed.

→ Find processing instructions and more on www.egger.com/perfectsense

U999 PM/ST2
U999 PG/ST2

PerfectSense Lacquered Boards

Gloss & matt for a premium look.

PerfectSense is a **premium category** of high-gloss and matt lacquered boards with an MDF substrate. It meets the demand for **high-quality finishes** that appear in some of the **more sophisticated living and commercial spaces**, including high-end retail and furniture design. Possible applications include wall paneling, wardrobes, sliding doors or furniture fronts.

PerfectSense Matt has an **extremely low-sheen, matt surface**, that comes with an "Anti-Fingerprint" finish.

PerfectSense Gloss has a **highly reflective surface** and an exceptionally smooth finish.

Edging

When details matter.

EGGER edging is designed for covering the exposed edge of our wood based panels which offers a **sleek, yet robust decorative finish**.

We provide both edging to match the board as well as accent edging to focus on the edge as a **design feature**.

Your benefits at a glance

- Save time and effort by sourcing boards and edges from a single supplier
- Colour and texture matched to our boards ensuring a consistent appearance
- Make the edge a feature by choosing from our selection of Accent edges or use any of our more than 300 edges to create a contrast
- Easily fabricated
- ABS/PMMA Edging is easy to dispose of by incinerating together with wood chip waste in approved systems

Good to know

Different features and dimensions according to the applications and look you are trying to create.

→ Find out more on www.egger.com/edging

If you need an edge width not available from our stock we can cut to your requirements.

→ Scan QR code and cut to your specific requirements using our edging configurator

H3170 ST12

Your benefits at a glance

- Highly durable and resistant to scratches and impact
- 300 decors available from one sheet
- High-quality material reproductions saving costs and processing time compared to materials such as veneer, metals, stone and lacquer
- Environmentally friendly, resource conserving solution compared to using real materials
- When used on square and rectangular shaped furniture the joins can be hidden by bonding the laminate to each external surface
- Almost all are postformable

Good to know

Different features of laminates are linked to different sizes and applications:

On request, they come in flame retardant quality.

Door size optimised laminates **save you costs and material waste.**

For a seamless finish and continuity of colour all the way through, use a coloured core laminate.

Our Feelwood XL product **combines the texture of wood with the benefits of laminate.** Its extra large format is optimised for cutting.

We also provide laminate bonded boards to save processing time and laminate from rolls to optimize cutting and reduce waste.

→ Find out more on www.egger.com/laminate

Laminate Products

Your highly durable surfacing option,

for both curved and straight applications.

EGGER Laminate is made up of a decorative paper on the surface and multiple layers of kraft paper in the core. The laminate sheet must be fabricated (bonded) to a suitable substrate (normally chipboard or MDF).

Due to its multilayered construction, our Laminate is **the perfect material for medium to high traffic areas** or where a hard wearing surface is required, such as counter tops, doors, reception desks and a whole host of other interior and shopfitting applications. Also, **an ideal solution for curved surfaces or rounded profiles.**

Difference of Coloured Core Laminate

For the construction of Coloured Core Laminate, the colour of the decorative impregnated paper throughout the thickness of the laminate is the same.

Door Size Laminate

Opening up possibilities.

EGGER Laminates are suitable for a variety of applications. Beside the common formats, the collection also provides two laminate dimensions especially suited for doors. Naturally, the surface properties of EGGER Laminates comply with current standards and regulations.

Their high resistance against surface abrasion, impact resistance and scratch resistance guarantee a long lifespan.

Many of the 90 door size laminate decors are also available in other products. This allows you to precisely coordinate your doors with other furniture elements within the room.

Format Door Size Laminate	
Format 1	2150 × 950 × 0.8 mm
Format 2	2150 × 1020 × 0.8 mm

Standard Format	
Format 3	2800 × 1310 × 0.8 mm

Format 1

Format 2

Format 3

Your benefits at a glance

- Save money due to lower waste as sizes are optimized for the production of doors
- Highly durable making it suitable for high traffic areas
- Woodgrain decors provide the look & feel of solid wood
- Doors can be coordinated with other furniture parts of the room due to matching materials such as MFC & ABS edging

Good to know

The surface properties of laminates comply with current standards and regulations (EN 438:2016).

If you search for decor and texture matching lamination options of flat surfaces such as door leaves, door casings or frames, we offer you our Micro laminate in 0.15 mm thickness for industrial production. Solutions for door skins can be found in our offer of Eurodekor Thin Chipboards which have a very smooth and fine surface and are suitable for lamination in matching decors.

→ Find out more on www.egger.com/doorlaminate

Good to know

Our Compact Laminate range contains **more than 180 decor and texture combinations.**

They come with a standard or flame retardant black core. To give your furniture a completely different look we offer Compact Laminates with a white core (W1001 ST9 only).

Also, its durability opens up **new opportunities** for Point of Sale and display modules where strong resistance is needed.

→ Find out more on www.egger.com/compactlaminate

Your benefits at a glance

- Create sleek and elegant designs
- Long lasting due to its hard wearing properties and impact resistance
- Moisture resistant, hygienic and easy to maintain
- Resistant to common cleaning products and chemicals
- Homogeneous material for precise processing enabling customized design: Perfect material for all kind of milling and routing
- No edge or surface finish required

Compact Laminate

Your elegant solution for high traffic applications.

Compact Laminates have a multilayer structure. They are produced by bonding a fibrous core, together with melamine impregnated decor papers, under high temperature and pressure to create a self-supporting panel from as thin as 6 mm.

This makes it **particularly suitable** for areas where there may be an **extra requirement for hygiene standards** and **enhanced moisture resistance** such as in bathrooms, sanitary facilities and changing rooms.

The combination of durability and sleek design make Compact Laminate so interesting for **a variety of solutions** within the commercial interiors market, from desks in offices to vanity units in hotel bedrooms.

Compact Laminate

Worktops

Your everyday work surface.

The **high quality and durability** of this product make it the ideal material for kitchen, bathrooms, offices, and shopfitting applications such as counters.

The raw chipboard substrate has a **decorative laminate** bonded onto the surface which can be either profiled around the edge (postforming model) or left square (ABS edged).

Your benefits at a glance

- Durability for a long lifespan
- High-scratch and impact resistance
- For a coordinated look a selection of our Worktops can be matched with doors, carcasses, shelving and end panels made from MFC
- Hygienic and stain resistant
- Easy to look after and to maintain
- The look and feel of solid wood, stone and ceramic without the cost

Model 100/1.5

*not ST28 and ST37 Worktops

Model 300/3

Good to know

Match your requirements with our range from **classic to modern wood and stone reproductions**. **Matching splashback panels, wall end profiles, accessories as well as laminates from the rolls** are also provided.

To **add even more realism** choose from our portfolio of endgrain edges.

Make a design statement with Accent Edging.

F310 ST87
H3303 ST10

Your benefits at a glance

- All Flammex products are classified Euroclass B according to EN 13501
- Regulates flammability by giving time for a response until a fire fully emerges
- Regulates smoke and droplet development during fire

Good to know

Design freedom is never compromised by function. Therefore we offer Eurodekor Flammex (chipboard core), Eurodekor MDF Flammex and Laminate Flammex in over 200 designs. Moreover, Compact Laminate Flammex with a black core is available in over 180 decors.

→ Find out more on www.egger.com/flammex

Flammex Flame Retardant Products

Safety by design.

Many projects, such as schools, hospitals, hotels and other public spaces have strict fire safety requirements. EGGER Flammex Flame Retardant products are classified Euroclass B according to EN 13501-1, and comply with common standards of fire protection. Their fire retardant qualities take nothing away from the design possibilities for your projects as Flammex products can be coordinated with almost the full decor offer of our collection.

Our Flammex product range

- Laminate Flammex
W1000 ST9
- Compact Laminate Flammex
W1000 ST9
- Eurodekor MDF Flammex
W1000 ST9
- Eurospan Flammex

W1000 ST9

More than just furniture and interior products.

As our promise “More from wood” indicates, besides the furniture industry and interior design area, **we also supply products for flooring and wood construction.**

Depending on what the space is used for, EGGER flooring offers different properties, while still being **easy and quick to install**, robust, resilient, easy to care for and environmentally friendly.

Our three types of flooring cover all eventualities:

Design+ Flooring

Ultra modern. Ultra robust.
Ultra versatile.

Used mainly for commercial, but also residential premises with high impact and traffic areas.

Laminate Flooring

Durable. Natural. Economical.

Long-lasting floors for residential and commercial premises with normal traffic.

Comfort+ Flooring

Warm. Silent. Ecological.

Perfect for residential premises where comfort is key.

→ Find out more on www.egger.com/flooring

For all your construction needs.

Whatever you have planned, EGGER wood-based materials and solid wood products are **practical, efficient and reliable.**

We supply a **wide range** of environmentally friendly OSB boards, OSB tongue & groove boards, vapour-permeable and moisture-resistant fibreboards and timber – for interior design, renovation projects, timber engineering as well as for timber frame house construction.

→ Find out more on www.egger.com/buildingproducts

Textures

We strive for authenticity in all our decors, so we pay special attention to not just the look but the feel of them. Our textures add expression and character, depth and realism, all with the aim of making them indistinguishable from the original material. They allow you to create high value projects.

Next generation of textures

Your needs are paramount to us. So we've invested heavily in innovation and have been able to develop decors and textures that recognise your desire for not just natural looking but authentic feeling products. Recent advances in our product development, have allowed us to create Feelwood, a next generation development, that aligns texture and print to create a high value finish.

H1334 ST9 Light Sorano Oak

Take a look at the decor H1334, Light Sorano Oak. Developed over ten years ago. It remains incredibly popular and has been selected for premium hotels and shops as well as domestic kitchens and bathrooms.

H1145 ST10 Natural Bardolino Oak

Now compare it to a decor from the same species H1145, introduced in 2012, which is a more heavily textured and realistic oak decor.

H1180 ST37 Natural Halifax Oak

Finally, check out our latest innovation in finishes where the grain and texture align. We call this new generation, Feelwood, as both the visual and tactile aesthetic of wood have been recreated.

Feelwood

– the name says it all.

Our decors have continued to evolve as new technologies have become available. Our latest innovation is the pinnacle of this evolution as both the visual and tactile aesthetic of wood have been recreated. It's all about giving you the choice and the ability to offer your customers different options depending on their expectations and budget.

Authentic look

The surfaces are indistinguishable from both veneers and solid wood.

Lightfast and durable

Our reproductions have an advantage over the original material in that they are more durable and lightfast. Furthermore, if a replacement panel is required, a reproduction will be a perfect colour match to the panels already in-situ.

Feelwood available in matching products

Synchronised pore surfaces are available on chipboard and MDF boards, Eurolight lightweight boards, Worktops, Compact Laminates and Laminates. To complete the look, we offer an ABS edge with the look and feel of sawn timber.

New business opportunities

The premium look and feel of our new finishes open up a whole range of options for our customers. Furniture manufacturers can now develop a new, higher value range or piece of furniture, door or kitchen. Specifiers or shop fitters can also offer a higher value look and a more cost-effective and durable alternative to veneer.

A close-up photograph of a wood surface with a natural, slightly uneven grain pattern, showing knots and planking. The color is a warm, medium brown.

ST28 Feelwood Nature

This texture is characterised by its authentic feel. Knots and planking create a natural feel reminiscent of solid wood.

A close-up photograph of a wood surface with a fine, uniform grain. The surface has a subtle sheen and a slightly textured appearance, characteristic of a brushed or matt finish.

ST33 Feelwood Crafted

This surface displays an interplay of matt and light-gloss elements. The matt and softly brushed pore provides the surface with a beautiful depth effect, giving it a very natural look – together with its pearlescent sheen.

A close-up photograph of a dark, charcoal-colored wood surface. The grain is very pronounced and has a tactile, almost wavy appearance, with soft recesses following the grain lines.

ST29 Feelwood Ambiance

The texture has a striking, yet elegant appearance. It is ideal for large applications to create a tasteful, sophisticated feel. It traces the grain with soft recesses, creating a tactile effect.

A close-up photograph of a wood surface with a natural, slightly uneven grain pattern, showing knots and planking. The color is a warm, medium brown, similar to ST28 but with a more pronounced texture.

ST37 Feelwood Rift

This texture has an authentic solid wood finish, which is emphasised with its synchronised surface on the decor series Halifax Oak, giving the cracks and knots a tactile feel.

A close-up photograph of a wood surface with a very fine, dense, and slightly irregular grain pattern. The color is a dark, rich brown, and the surface has a brushed, tactile quality.

ST36 Feelwood Brushed

This surface exhibits a deeply brushed but very natural, matt character that gives many different types of wood an extremely authentic feel.

A close-up photograph of a wood surface with a very fine, dense, and slightly irregular grain pattern. The color is a dark, rich brown, and the surface has a brushed, tactile quality, similar to ST36 but with a slightly different grain pattern.

ST38 Feelwood Pinegrain

The texture displays a deeply brushed softwood appearance with a high value pearl effect thanks to the matt and gloss elements. The surface creates the look of painted or lacquered solid wood when applied to uni colours.

PerfectSense

The future has arrived. PerfectSense lacquered boards are much more than a conventional melamine-faced MDF board. They epitomise the next generation of matt or gloss textures and represent a new premium standard of board. Manufactured using a sophisticated lacquering process that is applied with precision to the surface, PerfectSense Gloss offers an exceptional reflective effect and smooth finish. PerfectSense Matt, by contrast, feels warm and velvety. Compared to many other lacquered boards they are both scratch-resistant and robust.

PG

PerfectSense Gloss

PerfectSense Gloss is characterised by its exceptionally smooth and deep reflective finish.

PM

PerfectSense Matt

The warm and silky feel is combined with high resistance and Anti-Fingerprint properties to provide a high quality, matt finish.

More choice and authenticity

Uni-colours and wood reproductions remain extremely popular in the furniture and interior design world. Furthermore, the need for authenticity means that the choice of materials is paramount in combination with unis and woodgrains.

Over the years our wide range of materials have become ever more natural and authentic, with tactile textures that enable a dramatically expanded palette to work from, as the following examples demonstrate:

Materials

ST82 Mineral Granite

This strong textured surface provides a natural finish to striking stone decors and furthermore, is highly resistant.

ST87 Mineral Ceramic

This texture exhibits pronounced matt-gloss effects, simulating the surface and feel of a ceramic sheet.

ST89 Mineral Rock

The surface texture of washed-out, satined granite is ideal for uni colours.

ST16 Mineral Plaster

This surface has a plaster or spatula look, containing both deep and raw as well as smooth and glossy elements. On reproductions of concrete, metal and stone it creates a finish difficult to tell apart from those actual materials. It provides uni colours with a striking material character. On certain decors, such as Claystone, the surface also achieves a synchronised effect.

ST76 Mineral Rough Matt

When it comes to worktops, the demand for matt surfaces in combination with stone effects is increasing. The ST76 Mineral Rough Matt texture is modelled after a mottled and softly brushed natural stone surface. It can be applied to numerous stone reproductions, including slate and marble.

Woodgrains

ST22 Deepskin Linear

A deep brushed finish with a matt-gloss linear grain. This offers a realistic surface for linear woodgrain colours, giving them more naturalness and depth.

ST86 Deepskin Legno Horizontal

This is a horizontal version of the ST22 texture above. Its softly brushed character often seen in softwood is used both on horizontal wood decors and uni-colours, looking especially good on white.

ST10 Deepskin Rough

A highly authentic and realistic texture for solid wood and material reproductions.

ST12 Omnipore Matt

This is an all-over pore with irregular distribution of linear pores, and pores of various depths, which gives the surface its natural look. A light sub-structure provides this surface with a velvety, pleasant touch.

ST2 Smoothtouch Pearl

A mini-pearl texture, with a medium gloss level. This surface is robust, very durable and is best used with uni and pearlescent colours.

ST9 Smoothtouch Matt

Used with uni colours and woodgrains offering a very soft and natural feel. This texture supports the trend for matt surfaces.

ST15 Smoothtouch Velvet

A smooth, flat surface finish with low gloss levels and low maintenance. Works well with a wide variety of woodgrains and material reproductions.

HG HighGloss

A smooth surface for CPL with high gloss level, especially suited for uni colours and premium woodgrain decors. For MFC, we offer ST30 with a different high gloss level.

SM Semi Matt

A smooth, paint-like and untextured surface finish.

Smooth Textures

Decors

The EGGER Decorative Collection has been broadened to cater for an increasingly wide range of applications and styles.

A more diverse collection gives you the resources to combine different materials, colours, types of wood and style directions with each other. This diversity requires more orientation within the collection.

Neutral Unis

This palette of colours is all about creating balance. Whether in combination with each other or as a neutral mix with something more striking. New developments include more white options, shades approaching black as well as an increased selection of cooler grey tones.

Basic Whites

Please see fold out on the backside cover for the description of the product icons.

White Selection

Premium Whites

Clear and Strong Beiges

*For MFC, we offer ST30 with a different gloss level.

Cool Greys

Warm Greys

Colourful Unis

Coloured unis include muted as well as very bright colour tones. To cover a wider colour range, the intermediate tones orange, brown, violet and pink have been expanded. Further, all colours feature a trendy matt texture.

H3081 ST22 Black Havana Pine

H3090 ST22 Shorewood

PerfectSense

The range of PerfectSense lacquered boards has been expanded. PerfectSense Matt is now available in 8 colours and PerfectSense Gloss is available in 6 colours.

PerfectSense Gloss

For laminate, we offer HG High Gloss with a different gloss level.

PerfectSense Matt

Protecting the environment begins with sustainable forestry.

Conserving resources is a top priority for EGGER. In fact it forms part of our core values. We achieve this by promoting sustainable forestry and through integrated plants, energy generation in our own biomass power plants, state-of-the-art manufacturing technology and environmentally friendly logistics systems.

Through the material and thermal use of wood in a closed cycle, we reduce CO₂ emissions that are harmful to the environment.

Save time and hassle when tendering or collecting documents for green public procurement and green building schemes. **Verified, transparent environmental information on the product is readily available in our EPDs.**

→ Find out more on www.egger.com/environment

→ Scan and download the full Environmental Brochure here

All processes surrounding our sustainable philosophy are efficiently linked in an environmental cycle.

Wood materials production and upgrading

To continually improve our environmental performance in the production process, we select internationally certified energy and environmental management systems in accordance with ISO 50001, ISO 14001 and EMAS.

Consumer/Product Environmental Performance Assessment

We provide full transparency through Environmental Product Declarations (EPDs). They give end customers important information about environmental and health aspects – for each of our core products.

Sawmill

At our sawmill in Brilon, every year 800,000 cubic metres of spruce and pine logs from sustainable forestry are used. Sawmill by-products are directly processed further in the woodbased materials production.

Recycling

Recycled wood, consisting of waste wood from disposed goods and those not fit for sale, is prepared and used for chipboard production.

Renewable energy

Biogenic fuels, which can no longer be used materially, are turned into heat and green electricity by us in our own biomass power plants.

Sustainable forestry

We act responsibly with regard to forests and the environment and are certified according to PEFC and FSC®, depending on the availability of the wood. In accordance with the EU Timber Regulation, EUTR, we only buy timber in a region from monitored suppliers.

Service

Your everyday resource.

Naturally we want you to get the most out of our products, so we offer a range of services to help you do just that. From support with visualising your designs to answering product queries and everything in between, we're here for you both online and in person.

EGGER Collection App

Our world in your hands | With the EGGER App you'll have the entire Decorative Collection at your fingertips, whenever and wherever you are. Enjoy instant access to the Virtual Design Studio with all the decors, numerous room scenes and a number of functions for free. Generate new creative ideas through the inspiration space, or simply scan the QR code on your sample to use the decor directly in the VDS.

VDS

Bringing your ideas to life | The Virtual Design Studio is the perfect consultation tool, allowing you to visualise your ideas and those of your customers easily and online. EGGER flooring and furniture decors can be easily placed in a wide variety of updated and existing room sets. For your convenience, we suggest various EGGER decor combinations to suit your project. For extra options and to give your customers an even more professional consultation service, choose VDS Profi. Everything is available online or in the app across all mobile devices – take a look now, it's just a click away.

→ Find out more on www.egger.com/vds

Website

Your source of inspiration | From the practicalities of technical datasheets, processing instructions, certificates and product availability to case studies or trend information, egger.com is the place to head to. Search by decor number and name, texture or colour code to instantly find decor combinations that support you in your daily consultations. Register at myEgger and get access to decor scans and other useful services such as video downloads about current marketing topics.

→ Register at myegger.com and benefit now

Sampling

Try before you buy | Check out our sample offer – all quickly available and tailored to your requirements.

→ Find out more on www.egger.com

To immediately get to know the decors you are looking for in real, visit your local distributor showroom.

→ Your local distributor: www.egger.com/distributorindex

Availability

The product icons below each decor image, starting on page 57, indicate which decors are available with which products. Details can be found in the availability guide or at www.egger.com/availabilityguide

Please turn the page for the description of the product icons.

CEE_EN_1207280_01/2017
Subject to technical modifications and amendments. All decors shown are reproductions and shown at a scale of 1:2.
Due to variables in the printing process, colours may vary slightly from the actual product.
